

## Early Childhood Educational Pathways in the University of Hawai'i System Birth Through 5 Years Programs, **Not for HTSB License**

People on these educational pathways generally pursue careers working with children and families in the birth - PK sector. Graduates of these programs seek careers in family child interactive learning programs, family child care, home visitation, center based preschools and other variations of early learning programs serving children birth to 5 years and their families. They may seek employment in settings that are licensed by DHS, however it is not necessary for them to have their own HTSB teaching license because they **do not intend to teach in a public school settings (DOE PK-3)**.

\* PK-3/SpED BEd will pilot statewide in Fall 2015.
